Reimagine productivity with Microsoft Dynamics 365

Transform business process automation and people productivity with Microsoft Dynamics 365 and the Microsoft Cloud
Delight your customers, grow sales, manage finances, and stay productive with Microsoft Dynamics 365.

Keep your business growing

Quick to implement, easy to use, with the power to support your growth ambition. Microsoft Dynamics 365 provides a seamless experience across applications and devices—start with what you need today and easily adapt as your needs change.

No matter how you access and use your systems—anywhere, anytime, across your devices—you will receive the same seamless experience and enterprise-grade security to protect your business and customers. Microsoft business solutions are designed to get you up and running quickly and help you grow efficiently as your needs change.

Businesses around the world are seeing the benefits of helping employees work smarter together, automating cumbersome manual tasks, and using customer data as a factor in deciding what to offer. Cloud and mobile solutions are becoming a means of transforming business processes and enabling new work flows.

Replacing existing systems may seem daunting, complex, and too significant an interruption. With today’s modern applications in the cloud, the rewards far outweigh the risks. Increased efficiency, enterprise-grade security, and increased mobility—all without up-front capital expenses and with less dependency on IT infrastructure—make it easier for businesses of all sizes to use technology as a competitive advantage.
Redefine business processes and reinvent productivity

You’ve reached a stage where customer demands drive growth, but you may not have the right tools or processes in place to anticipate buying behaviors or build loyalty. Your opportunities could be limited by basic accounting software or stand-alone customer relationship management systems. But investing in a complete technology overhaul isn’t realistic, and do you really have the capacity to add new IT staff to manage additional systems?

You need technology that enables your business: technology that’s affordable even on a small business budget and doesn’t restrict your future options. Microsoft Dynamics 365 help you move away from the complexity and silos traditional ERP and CRM systems so you can focus on the things you enjoy about running your business and connecting with your customers.

Spot trends, anticipate demand

When key parts of your business are connected, your people can do more, and your business will grow. Microsoft Dynamics 365 can help connect the pieces of your business and reveal insights about your customers, operational processes, and your best path for growth.

Share data and collaborate for better results

Imagine the time and cost savings if your IT department could use real-time operational data to help your people make better decisions and serve customers more effectively. By connecting customer relationship management and back office processes, operations can anticipate increased demand based on sales forecasts. Your finance team can monitor sales and expenses in real time for a realistic view of cash flow. And customer-facing teams are armed with a complete view of customers to help them jump on new sales opportunities and improve customer service.
Why consider new business applications in the cloud?

Transform your organization into a flexible, affordable driver of innovation.

**Gain insights**
Harness the power of your data to improve processes, spot trends faster, and outperform your competitors.

**Save money**
Manage your business without the burden and cost of installing, updating, and maintaining software and managing hardware.

**Improve productivity**
Go beyond stand-alone business applications with connected solutions that drive business process automation and employee productivity.

**Reduce IT dependencies**
With software and applications running in the cloud, non-technical folks can better serve customers, manage financial data, and stay connected without having to wait on IT for answers.
GEARYS has been the pinnacle of luxury retail for 85 years, servicing a diverse clientele from the store’s location in Beverly Hills, California. GEARYS modernized its business management systems, starting with Microsoft Dynamics 365, to better serve existing customers while reducing costs.

“Dynamics keeps track of our inventory, our clients, our orders. We then bring all that information into Microsoft Dynamics 365,” explained Mary Donahue, director of web operations.

Old-fashioned service meets 21st century convenience. GEARYS uses Microsoft Dynamics to keep track of customer information. Sales associates can instantly call up profiles and past history on mobile devices on the sales floor, delivering a personalized experience for every client.

Better data for better visibility. Internally, GEARYS can forecast purchasing trends to ensure opportunities aren’t missed. “Microsoft Dynamics 365 gives us the ability to better forecast what our clients are buying,” said Donahue. “We’re not playing catch-up, we’re out ahead of it.”

Improved service, reduced cost. Moving all the inventory and sales data into a single system lets GEARYS track and control costs. “I anticipate a 10–15 percent reduction in costs,” said CFO Patrick Walters.

“You can’t grow and keep your records on paper. You need to make one voice and have one place where you keep all of that information.”

Grow efficiently

Don’t let technology limitations stand in the way of growth. Microsoft Dynamics 365 efficiently and cost-effectively scale as your needs change or business grows.

 Automate and easily adapt business processes. Simplify your finances, streamline your supply chain, manage your sales teams, and make confident decisions that expand your business, not your budget. Be productive from the start with a familiar and role-based user experience to support growth without added headcount.

 Manage your business, not your servers. Running your business applications in the cloud means reduced upfront software costs and no costly on-site servers to manage. Plus you can add or remove users as your team changes. Rather than dedicating operational headcount to manual tasks, grow capabilities by automating business processes and repurpose your team to focus on more strategic projects.

Connect with customers

What if you could anticipate what your customers want? Microsoft Dynamics 365 helps you gain deeper customer insights, manage and grow sales, and maintain profitable, loyal customer relationships.

360-degree customer view. You’ve been compiling years of data on your customers, even without realizing it. When you can see and analyze all your customer data in one view, you can spot winning sales tactics and fix the broken processes. Whether it’s current cases, buying history, or previous communications, making this detail readily available to your team means more personalized, targeted interactions that lead to results.

Stay focused on success. Zero in on the most promising leads with data-rich, interactive dashboards that help track your most active customers and uncover new sales and service opportunities. Guide your team with role-specific workflows and familiar processes built around sales best practices. And use data and insights to customize and enhance sales presentations for more impact.
Do business anywhere

Get more done in the office or on the go with enhanced, secure access to tools and data across all your devices.

Bring your office with you
No matter what devices your team uses or where they need to work, they can stay connected to key business data like customer details, product information, and order status to deliver better customer service. And with a consistent user experience and single sign-on across calendar, email, files, collaboration tools, and business processes, getting to the data you need quickly is simple and intuitive.

Respond at the speed of business. With virtually anywhere, anytime access and the ability to track presence and instantly message team members, you can connect, share, and collaborate in real time and get answers right when you need them.

Safeguard your business

Your customers trust you with their data. Make sure you earn it by keeping all your systems safe, centralized, and protected, while simplifying compliance, audits, and reporting.

Prepare for the unexpected and mitigate risk. A proven business system from Microsoft has built-in controls and role-based business workflows that can provide structured access to sensitive information. Plus, with both physical and virtual security including access control, encryption, and authentication, you can help protect your data on all your devices.

Guaranteed uptime and data backup. You may not be working around the clock, but your data is always on call. Microsoft cloud solutions are reliable, scalable, and come with a guaranteed 99.9 percent uptime, so your team and customers can access information anytime. And with continuous backup across globally distributed datacenters, you’ve got the built-in data redundancy to help protect you from a potentially catastrophic loss.

SOLUTION IN ACTION

Connected cloud solution helps nonprofit manage programs and engage with worldwide donors

World Animal Protection is an international animal welfare organization that has been in operation for more than 30 years, providing aid, education, and government outreach to help put an end to animal cruelty. The nonprofit, headquartered in London, has regional hubs in Africa, Asia, Europe, Latin America, and North America, and offices in 15 countries.

To get the most out of its resources and streamline management of global finances, operations, and sponsorships, World Animal Protection uses Microsoft Dynamics 365 for a complete, trusted, connected, cloud-based solution.

Consistency and consolidation. With Dynamics 365, the organization has consolidated geographically disparate finance and operations processes, and no longer relies on a disconnected network of spreadsheets.

Better visibility for better aid. Dynamics 365 provides better visibility into donors, budgets, and projects, helping the charity make sure funds are being properly managed and put to good use helping animals across the globe. Simeon Lewis, international head of IT at World Animal Protection, said the Microsoft cloud solution “enables us to use our resources in a more effective way.” And, it helps the organization stay accountable to its funders.

“Microsoft solutions enable this organization to deliver its animal welfare work in a way that maximizes impact for animals and delivers our resources in the most cost-effective way.”

— Simeon Lewis, International Head of IT, World Animal Protection
Key takeaways

- Microsoft Dynamics 365 brings together business applications, data, documents, and devices—with one unified user experience that provides greater control over your finances and operations, while delivering the insight you need to build and maintain customer relationships.
- Dynamics 365 boosts your productivity, improves customer insights, frees you to work anywhere, anytime, across your devices, and positions your business for growth.
- Gain even more benefits when your solution is deployed on Microsoft Azure, including more flexibility, lower total cost of ownership, security-enhanced anywhere access, and enterprise-grade infrastructure and support.
