Imagining the future: Microsoft AI Virtual Summit

Welcome & Opening

Angela Poe Russell
Host
Anchor & Reporter,
KING5-TV Seattle

Introduction to the Summit.

Think Big: Becoming an AI-Powered Organization

Mitra Azizirad
Corporate Vice President, AI and Innovation, Microsoft

What are the opportunities and challenges associated with building an AI-powered organization? We'll explore real examples of AI-powered organizations, how they create value and scale through AI, and how AI drives digital transformation today.

The Transformative Power of Artificial Intelligence

Çağlayan Arkan
Vice President,
Manufacturing Industry,
Microsoft

As AI moves from fiction to reality, it's imperative to discuss how it drives transformation in business and culture. Hear how AI has been thrust upon the scene to drive responsible innovation across categories like Supply Chain Technology, Workforce Management, and Customer Experience to help create organizational continuity and manage disruption.

Applying AI to Advance the Health of People, Organizations, and Communities

Tom Lawry
National Director for AI,
Health and Life Sciences,
Microsoft

AI has been transforming the healthcare and medical industry for years, and this trend has only been accelerated by the COVID-19 pandemic. This session illustrates use cases for AI in areas to demonstrate the lessons learned in delivering AI to scale.

Building and Managing Responsible AI

Natasha Crampton
Chief Responsible AI Officer,
Microsoft

With AI powering more businesses and organizations, complex societal questions surrounding the ethics of AI have emerged. We have identified 6 principles that we use to build trustworthy AI. Learn about those principles and how they fuel the cross-disciplinary use of AI at Microsoft.

How are Organizations Creating Their Own AI Future

Gretchen O'Hara
VP AI Country Strategy & Sustainability Partnership, Microsoft

Kendee Yamaguchi
Executive Director, Snohomish County, WA

Wesley Rhodes
VP, R&D and Technology Transformation, The Kroger Co.

We close the afternoon by hosting a panel discussion focused on How are Organizations Creating Their Own AI Future. This panel will be hosted by Microsoft AI Business Leader, Gretchen O'Hara, and joined with Microsoft customers, Kendee Yamaguchi and Wesley Rhodes who will share their real-experiences implementing artificial intelligence and explore common themes in creating and using "trustworthy" AI.
