

Not all government clouds are created equal

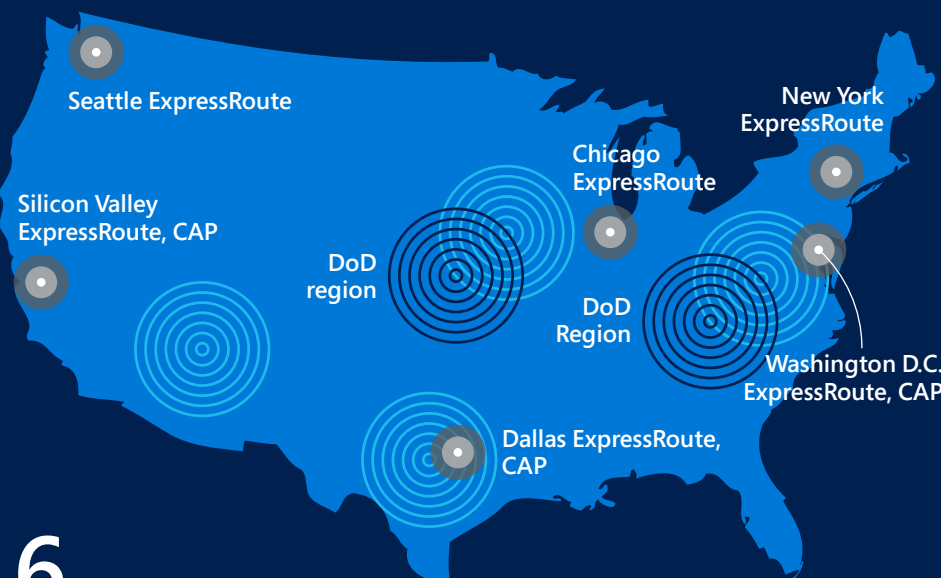

Government cloud adoption is accelerating. Federal spending on cloud services is expected to reach \$6.5B by 2019. **Microsoft Azure Government** is the most comprehensive, trusted, and flexible cloud solely dedicated to approved U.S. federal, state, and local government entities.

>80%
of U.S. Government Agencies use Azure

7,000
Federal, State and Local Government Agencies use Azure Government

6 million
government users
