

A hiker in a tan jacket and dark pants stands on a rocky mountain peak, holding a trekking pole. The background features a vast mountain range under a cloudy sky. Overlaid on the image are four blue triangles of varying sizes, arranged in a row from left to right, with their bases on the mountain ridges and their peaks pointing towards the sky. The triangles are semi-transparent, allowing the mountain landscape to be seen through them.

# BEHIND THE DATA

A Picture Perfect Lookbook  
to DIY Data Visualization

**Microsoft Power BI**

Best used to  
compare an existing  
percentage against  
a greater whole.

# Introduction:

We are compelled by beauty. Stunning visuals speak to us, beg for our attention, and can give the mundane an unthinkable advantage. What if you could turn the dry 1's and 0's of your data into powerful, engaging images?

These visuals represent a grandiose vision of what can be accomplished when intentional strategy and sound data meet powerful visuals. Create your own stunning visuals at <http://powerbi.microsoft.com/>.

"The alchemists in their search for gold  
discovered many other things of greater value."

—Arthur Schopenhauer, *Counsels and Maxims*

Column  
Chart

Compare data points  
in one or more  
series, or data with  
negative values.

"I never guess. It is a capital mistake to theorize before one has data. Insensibly one begins to twist facts to suit theories, instead of theories to suit facts."

—Sherlock Holmes, *A Scandal in Bohemia*

## Cluster Chart

Plot the distribution of data across a spread.

"The value of an idea lies in the using of it."

—Thomas A. Edison

Donut Chart

Isolate data sets  
into segments and  
compare each piece  
against a whole.

"He who would search for pearls must  
dive below."

—John Dryden, *All for Love*

Funnel  
Chart

Show the passage of  
data from one period  
to the next.

Pie Chart

Compare parts to  
a greater whole.

"Never confuse motion with action."

—Benjamin Franklin, *Autobiography of Benjamin Franklin*

"Too often we forget that genius, too, depends upon the data within its reach, that even Archimedes could not have devised Edison's inventions."

—Ernest Dimnet, *The Art of Thinking*

Area  
Chart

Compare the  
relationship of  
multiple variables  
and their changes  
over time.

Treemap

Display large  
amounts of  
hierarchical data.

## Spark a Reaction

Reveal the business truths in your data  
and discover the impact powerful visuals  
have on your audience in our new eBook,  
*What Color is your Data?*
