Employees lack time &
energy to do their job

3.5X

More likely to struggle
with strategic thinking

70%

Employees willing to
delegate work to AI

60%

of leaders say a lack of
innovation is a concern

Introducing

Microsoft 365 Copilot

Microsoft 365 Copilot

Works alongside you in the apps you use every day

Microsoft 365 Copilot

Grounded in
your business data

Microsoft 365 Copilot has real-time access to both your content and context in the Microsoft Graph.

Comprehensive
security, compliance, & privacy

Copilot inherits your security, compliance, and privacy policies set up in Microsoft 365.

Architected to protect
data

Your data never leaves its secure partition, and it is never used for training purposes.

Integrated into the
apps you use every day

Word, Excel, PowerPoint, Outlook, Teams, and more.

Individual user & admin
always in control

User decide what to use, modify, or discard.

Designed to
learn new skills

As Copilot learns about processes, it can perform more sophisticated tasks and queries.

Elevate Productivity

Unleash Creativity

1

Jump start the creative process so you never start with a blank slate again

2

Bring your ideas to life and quickly transform written documents into decks, complete with speaker notes and sources

Copilot in Microsoft Word

Copilot in Microsoft PowerPoint

Elevate Productivity

Unlock Productivity

1

Summarize email threads, quickly draft suggested replies, and clear inbox in minutes, not hours or days

2

Summarize key discussion points and suggest action items, all in real-time during a meeting

Copilot in Microsoft Outlook
Copilot in Microsoft Teams

What does it take to be M365 Copilot ready?

*Please note this is an early version of the technical requirements for Microsoft 365 Copilot Preview and subject to change

- ✓ Microsoft 365 E3 or E5 are licensing prerequisites¹.
- ✓ Azure Active Directory-based account is required².
- ✓ Several features require users to have a OneDrive account.
- ✓ Your users will need to be on the Current Channel for Microsoft 365 apps to have access to Copilot. Learn more about the channels in this article. <https://learn.microsoft.com/en-us/deployoffice/updates/overview-update-channels>
- ✓ Copilot in Word, Excel, and PowerPoint: first available in the web versions at <https://microsoft365.com> and later expand to desktop.
- ✓ For Outlook: Users need to be using the new Outlook for Windows (which is publicly called “the new Outlook for Windows” and it is currently in Preview. Users can load the new Outlook by toggling or Outlook Mobile. [Getting started with the new Outlook for Windows – Microsoft Support](#).
- ✓ For Teams: Users need to be using Teams desktop client or the web app. Both current and the new versions of Teams supported.
- ✓ For Loop: Tenants must have Loop enabled. [Learn more how to enable Loop](#). *(only required if customer want to use Copilot in Loop)*
- ✓ The richness of the cross-app experience will depend on the data sources indexed by Microsoft 365. Tenants with the richest data in Microsoft 365 (Exchange, OneDrive, SharePoint, Teams) will get the best results.

¹ For SMB Customers, M365 Business Standard or Business Premium will be eligible base licenses.

² Currently there is no obstacle to a hybrid solution such as using AAD as well a third-party single sign-on solution.

Some Copilot experiences require a websocket connection from the device where the Microsoft 365 app is running to a Microsoft service.
