Microsoft 365 Copilot Business Strategy

ROBERT GATES

Microsoft 365 Copilot Advantage

Your Al assistant for work

Integrated in the tools millions use every day

Word, Excel, PowerPoint, Outlook and Teams

Understands your work context

Trillions of signals in the Microsoft Graph deliver personalized and relevant responses

Extends to your business data

1400+ pre-built connectors to reason over your systems of record and line of business apps

Customize to make it your own

Create agents with your 1P or 3P data and apps using Copilot Studio

Enterprise-grade security, privacy, and compliance

Inherits Microsoft 365 security, permissions, policies, and admin controls. Built-in data governance with enterprise data protection.

Responsible AI

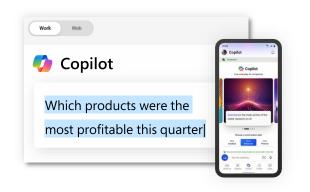

Measure Al impact and business value

Tools to drive adoption and impact with Copilot Lab, Learning Academy and the Copilot Dashboard

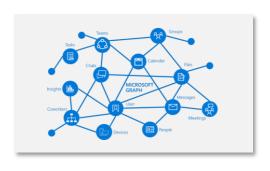

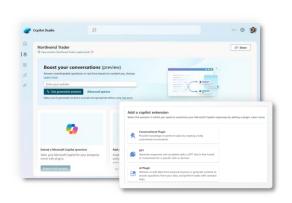

Microsoft 365 Copilot

Your Al assistant for work

Single chat destination for web and work

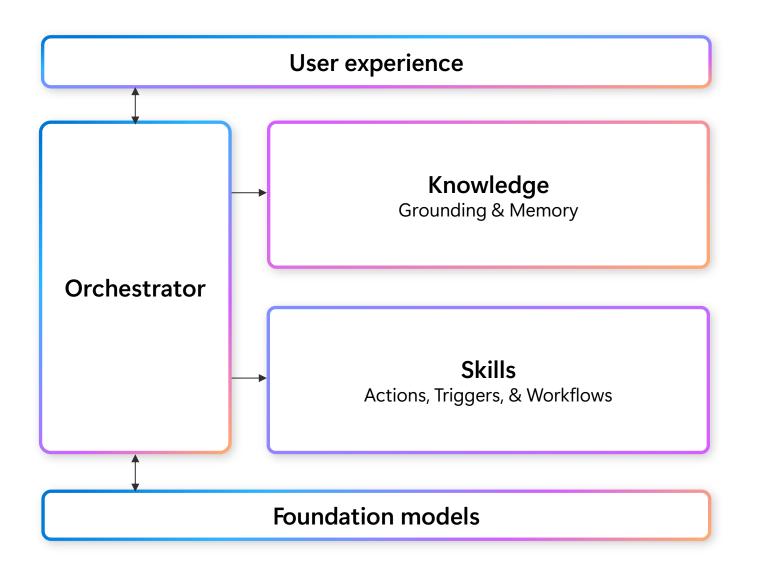

Microsoft 365 Apps

+

Microsoft Graph Copilot Studio

Enterprise-grade security, privacy, and compliance

How Microsoft 365 Copilot works

Microsoft 365 Copilot is the Al assistant you can trust

Security

Honors your existing permissions

Persistent label inheritance and DLP policies

Risk-based conditional access and endpoint management

Governance & Compliance

Ramp your data preparedness for Al

Detect and investigate noncompliant usage

Guided assistance to remain compliant with AI regulations

Privacy

You control your data

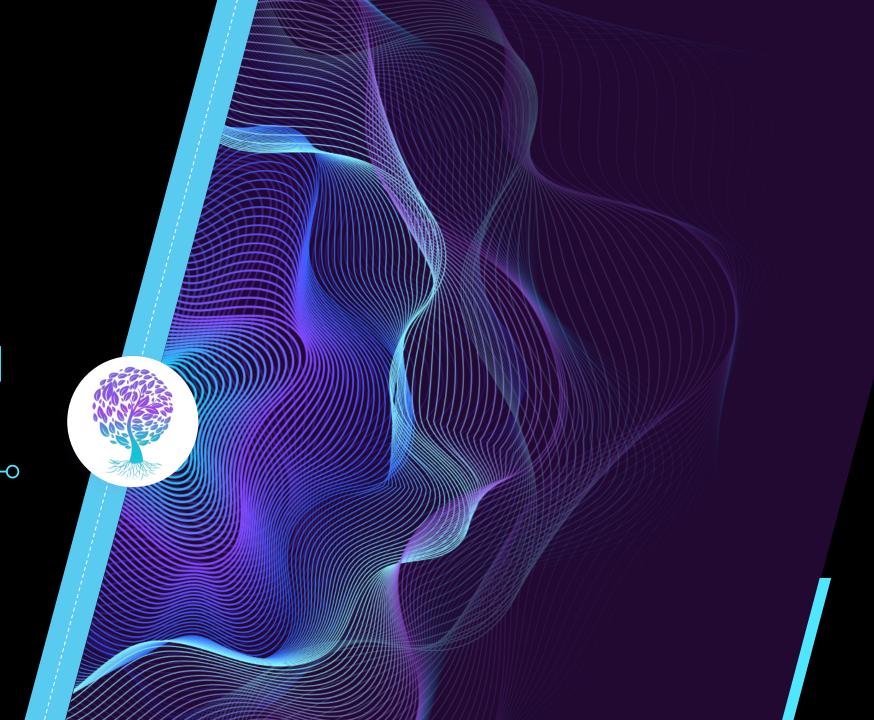

You control your data location

Your data isn't used to train foundation models

Your Microsoft 365 security, governance, compliance, and privacy policies

Security,
Governance,
Resources, and
Skilling

KARIN SKAPSKI

Security and governance go hand in hand

When customers talk about securing data for Copilot, they're not always *just* talking about securing data... they may be thinking about **data governance**, too.

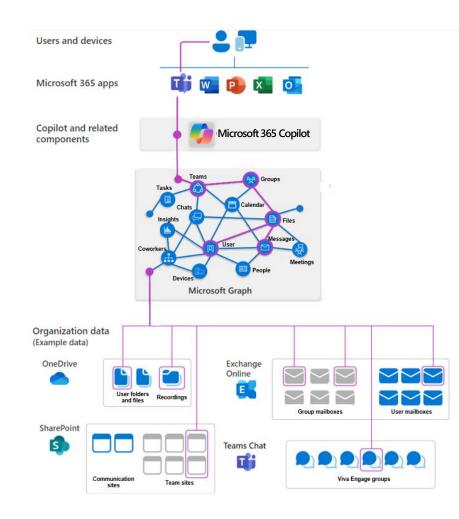

Microsoft 365 tenant data security and governance

Securing and governing **Microsoft 365 tenant** data = securing and governing data used with Microsoft 365 Copilot*

*does not apply to extensibility

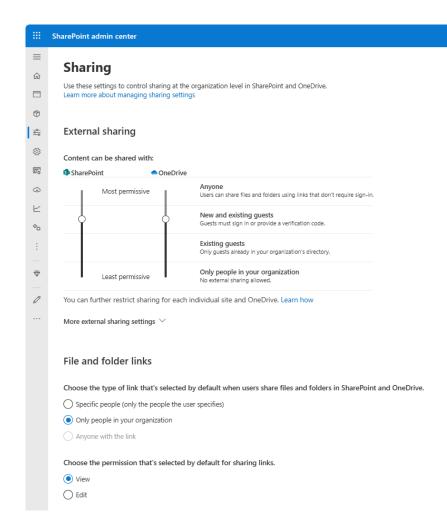

SharePoint and OneDrive data security and governance

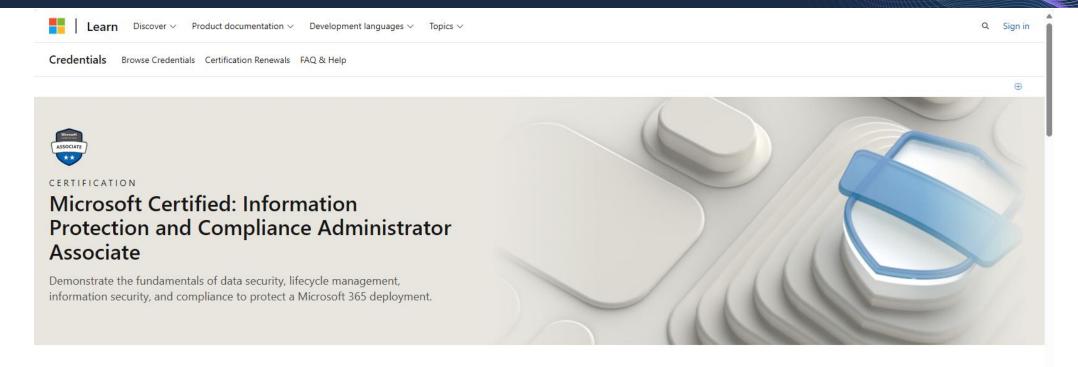

Securing and governing **SharePoint and OneDrive** data = securing and governing data used with Microsoft 365 Copilot*

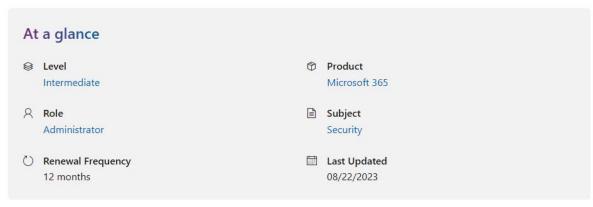

*not all data used by Microsoft 365 Copilot

Defining data residency

Data residency ensures that an organization's data is stored in a specific geographical location or within a boundary.

Data residency can be required by

- A local, national, or regional law or regulation
- A nongovernmental requirement such as an industry standard and certification of compliance
- The contractual terms of a business agreement

Data states

Data at rest

Data that is <u>not</u> actively moving and stored to a cloud storage location (e.g., email, calendar, files).

Data in transit

Data that is actively moving from one location to another. This can be across the internet, within a private network, or from one device to another.

Data in process

Any operation or set of operations performed on personal data or on sets of personal data, whether or not by automated means.

Microsoft 365 Copilot and data residency

- · Data at rest: interactions are stored in the relevant geography
 - · Copilot uses the Preferred Data Location (PDL) for users and groups
 - · If PDL not set or invalid, data is stored in the tenant's primary provisioned geography location
- · Data in transit: LLM calls are routed to closest data centers in the region
 - · Can call into other regions during high utilization periods
- Advanced Data Residency (ADR) add-on for Microsoft 365 enterprise customers who have comprehensive data residency requirements
 - · Requires migration
- Additional safeguards in place for European Union users: EU traffic stays within the European Union Data Boundary (EUDB)

Multi-Geo capabilities add-on

- Granular **user-based** data storage controls
- **Collaboration** across your global organization
- Simplified IT management controls

Covered workloads

Microsoft 365 Groups

Additional information: <u>aka.ms/Multi-Geo</u>

Advanced Data Residency (ADR) add-on

- Guaranteed data residency (storage at rest) in local datacenter regions for key Microsoft 365 workloads
- **Priority migration** to local datacenter regions
- Customer data at rest is stored in multiple cloud fault zones to support business continuity and disaster recovery

Covered workloads

Microsoft 365 Copilot

Viva Connections

Microsoft 365.com

Microsoft Teams

Microsoft Purview

European Union Data Boundary (EUDB)

The European Union Data Boundary (EUDB) enables customers in EU and EFTA countries to process and store their customer data in the EU.

Promises

Store and process data in the EU

Expand data centers in the EU

Provide for global security

Provide in-region support model

Data lifecycle management

- · Helps to ensure that Microsoft 365 Copilot responses are accurate
- · "Off-label", indirectly decreases data security risk
- Purview Data Lifecycle Management Retention Labels and Policies:
 - · Ensure documents are retained, archived, and/or deleted as needed
 - · Can also manage:
 - · Lifecycle of user prompts to Microsoft 365 Copilot
 - · Microsoft 365 Copilot responses to users
- Microsoft 365 Groups expiration policies:
 - · Clean up unused Microsoft 365 Groups, group-associated SharePoint Sites, and Teams
 - · Requires Microsoft Entra ID P1 or P2 licenses for the members of all groups to which the expiration policy is applied

Security and compliance scenarios for Copilot for Microsoft 365 (Enterprise SKUs)

	Scenario	O365 E3	M365 E3	M365 E5
	Login to Copilot for Microsoft 365 with a single identity	✓	✓	✓
δ	Enforce MFA when accessing Microsoft 365 to use Copilot	Basic MFA	✓	✓
ces	Enable end-user password reset, change, and unlock when accessing Microsoft 365	Cloud only	✓	✓
Identity & Access Management	Implement Conditional Access policies based on identity, device, and location when accessing Microsoft 365 to use Copilot		✓	✓
ity 8 nag	Enable near real-time access policies enforcement, evaluate critical events, and immediately revoke access to Microsoft 365		✓	✓
enti Mai	Control access over cloud apps (Microsoft 365 and third party)			✓
<u> </u>	Review who has access to content in Microsoft 365 – Copilot – to reduce oversharing			✓
	Require just-enough and just-in-time approval for admin roles that can manage Copilot app access			✓
.	Push/deploy the Microsoft 365 apps to devices and grant access to Copilot in these apps		✓	✓
	Manage Microsoft 365 apps updates		✓	✓
oint	Restrict the use of the Microsoft 365 apps and Teams – as well as Copilot in these apps – on personal devices		✓	✓
Endpoint Ianagement	Prevent saving files – including those generated by Copilot – to unprotected apps		✓	✓
Mai Ei	Wipe all work content – including content generated by Copilot – if a device is lost		✓	✓
	Revoke work access on noncompliant devices		✓	✓
	Search for Copilot generated data by content, keyword search, apply legal hold, and export the search results; investigate incidents related to Copilot and respond to litigations	Standard	Standard	Premium
	Audit logs for Copilot interactions	Standard	Standard	Premium
ૐ	Apply a retention policy for Copilot interactions	Standard	Standard	Automated
& e	Data Loss Prevention policies to protect sensitive data, generated by Copilot and saved in Microsoft 365 locations, from exfiltration	Files & email	Files & email	+ Endpoint, Teams
uri	Inherit sensitivity labels and cite sensitivity label in output and references in Copilot	✓	✓	✓
Data security { compliance	Prohibit Copilot from summarizing or including data that users have no extract permissions in its response messages for the said users	~	✓	✓
)at	Exclude sensitive files that users have no view permission from being processed by Copilot for the said users	\checkmark	\checkmark	\checkmark
_	Label and protect Microsoft 365 content, used by Copilot	Office only	Manual	Automated
	Detect business or code of conduct violations for Copilot prompts and responses			\checkmark
	Prevent Copilot access to content encrypted with Double Key Encryption			\checkmark
	Use ready-to-use machine learning trainable classifiers to identify sensitive information and create custom classifiers			✓
eat	Discovery and risk evaluation across 400+ Al apps in an organization			✓
Threat Protect	Ability to block or sanction the use of any discovered Al app in the organization Additional information: go.m	icrosoft.com/fv	vlink/?linkid=21	39145

Security and compliance scenarios for Copilot for Microsoft 365 (Business SKUs)

	Scenario	Business Basic	Business Standard	Business Premium
access	Login to Copilot for Microsoft 365 with a single identity	✓	✓	✓
	Enforce MFA when accessing Microsoft 365 to use Copilot	✓	✓	✓
જા ⊽	Enable end-user password reset, change, and unlock when accessing Microsoft 365	Cloud users	Cloud users	✓
Identity manag	Implement Conditional Access policies based on identity, device, and location when accessing Microsoft 365 to use Copilot			✓
<u> </u>	Enable near real-time access policies enforcement, evaluate critical events, and immediately revoke access to Microsoft 365			✓
Endpoint management	Push/deploy the Microsoft 365 apps to devices and grant access to Copilot in these apps			✓
	Manage updates for Microsoft 365 apps that use Copilot			✓
	Restrict the use of the Microsoft 365 apps and Teams, as well as Copilot in these apps, on personal devices			✓
Endp anag	Prevent saving files, including those generated by Copilot, to unprotected apps			✓
Ë	Wipe all work content, including content generated by Copilot, if a device is lost	✓	✓	✓
	Revoke work access on noncompliant devices that have access to Copilot	iOS, Android	iOS, Android	✓
	Search for Copilot generated data and interactions with eDiscovery capabilities	Search and export results	Search and export results	+ Case management and legal hold
≫ e ⊗	Audit logs for Copilot interactions	Audit (Standard)	Audit (Standard)	Audit (Standard)
Data security & compliance	Apply a manual retention policy for Copilot interactions	✓	✓	✓
ta se comp	Data Loss Prevention policies to protect sensitive data, generated by Copilot and saved in Microsoft 365 locations, from exfiltration			Files and email
Da	Inherit sensitivity labels and cite sensitivity label in output and references in Copilot			✓
	Prohibit Copilot from summarizing or including in its responses if users don't have permission to extract that data	✓	✓	✓
	Manually apply sensitivity labels and protect Microsoft 365 content used by Copilot			Files and email

Security and compliance add-ons available for Business Premium

Information Protection and Governance (\$7pupm)

- *Microsoft Defender for Cloud Apps assists in discovering SaaS apps and protects users from accessing risky ones
- Communications DLP (Teams chat) blocks sensitive content when shared with Teams users
- Endpoint DLP a prevents data leaks of sensitive items stored on Windows 10/11 and macOS devices
- Automatic sensitivity labels (client side) automatically discovers, classifies, labels, and protects sensitive data
- Machine learning-based sensitivity labels uses trainable classifiers to identify items and assign labels
- Records management helps manage legal obligations for businesses
- Advanced message encryption helps to control sensitive emails shared outside the organization

Insider Risk Management (\$6pupm)

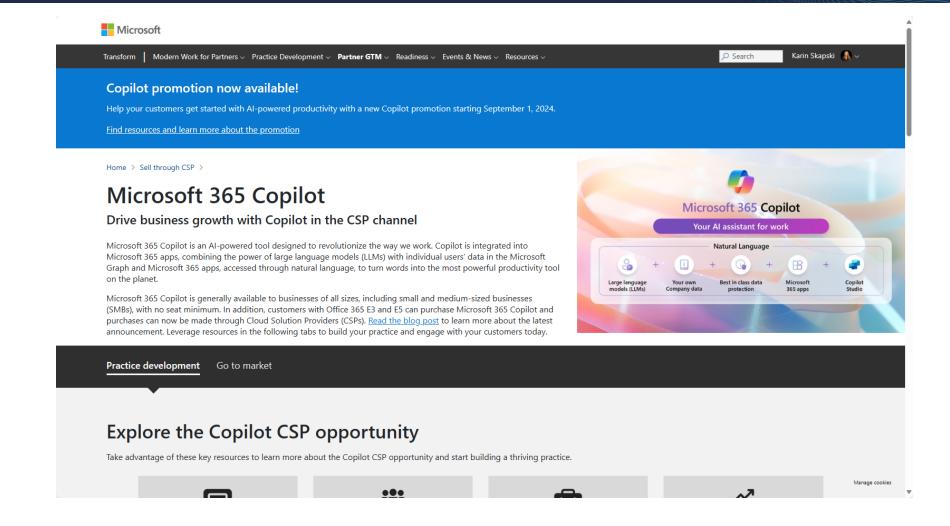

- Insider risk management a helps minimize internal risks by responding to malicious activities
- Communication compliance helps detect business code of conduct violations

eDiscovery and Audit (\$6pupm)

- eDiscovery (premium) end-to-end workflow for managing eDiscovery cases and investigations
- Audit (premium) featuring longer record retention and intelligent insights policies

Exchange Online Protection

Mitigate Device and Application Risk

with Unified Endpoint Management and Threat Protection

- Microsoft Intune
- Microsoft Defender for Endpoint
- Windows 11

Microsoft 365 Copilot

Protect your Copilot users against e-mail spam and malware

Reduce attack surface with a series of pro-active configurations activated on endpoints with access to Copilot, including protections to Microsoft 365 Apps (e.g. Word, Excel)

Enable **next-generation anti-malware** in corporate devices and personal mobile devices for the work profile (e.g. Android)

Protect users against web threats, filter unwanted web categories and even block specific URLs (e.g. unsanctioned generative A.I. web applications)

Network protection and Network Firewall protect your users from accessing dangerous domains and reduce threat risk.

Block or Allow removable devices and files in removable devices in Windows 11.

Secure and govern data in Copilot interactions

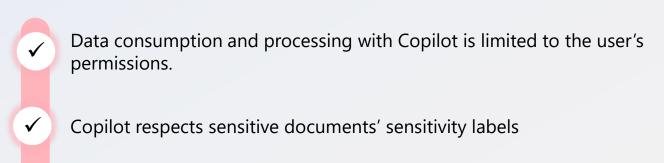

Microsoft Purview Information Protection

Remove inactive data to reduce obsolete insights

Restricted SharePoint Search

This is intended as a temporary solution to give you time to review and audit site permissions while implementing robust data security solutions from Microsoft Purview and content management with SharePoint Advanced Management

- Restricted SharePoint Search is designed for organizations particularly concerned about unintentional oversharing of content.
- When enabled, Copilot experiences and organization-wide search are limited to a select set of SharePoint sites, as well as the individual user's files and content.

- ¡Ö:

PRE-REQUISITES

- Available to tenants with Microsoft 365 Copilot subscriptions.
- Activation requires Global/Tenant/SharePoint admin rights.

IMPACT

Restricted SharePoint Search disables organization-wide search, while allowing you to select sites that you trust. This means users in your organization can use Copilot to reason over:

- An allowed list of curated SharePoint sites set up by admins (up to 100 SharePoint sites), honoring existing permissions on a site.
- Users' OneDrive, chats they are part of, emails they send and receive, calendars they have access to, etc.
- Files that are shared with and accessed by users.
- Content from users' frequently visited sites.

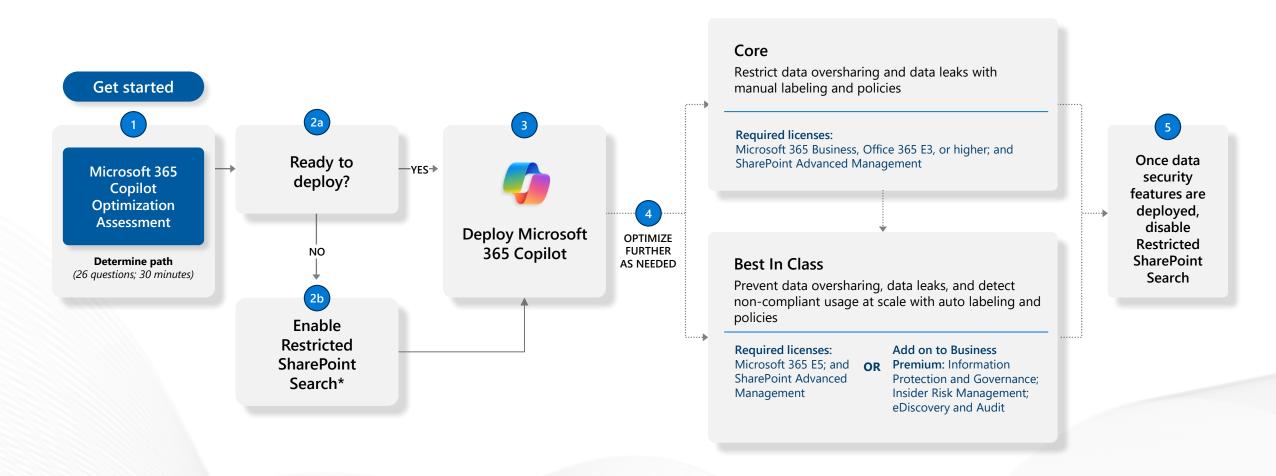

Access this blog for more info:

<u>Introducing Restricted SharePoint Search to help you get started with Copilot for Microsoft 365 - Microsoft Community Hub</u>

Apply appropriate Data Security controls

Get started quickly and continue to optimize along the way

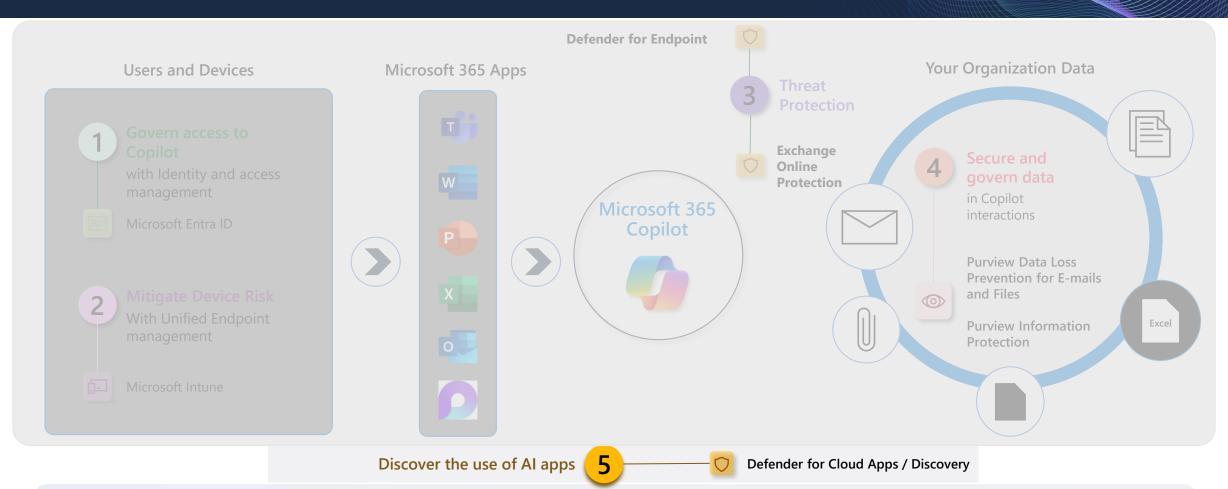

^{*} Restricted SharePoint Search will limit Microsoft 365 Copilot experiences and organization-wide search. It is a temporary option which gives you time to address oversharing concerns while getting started on your Copilot journey.

Discover and manage the use of Al apps

Defender for Cloud Apps / Cloud App Discovery

Discover & assess the risk across 400+ Al apps in an organization

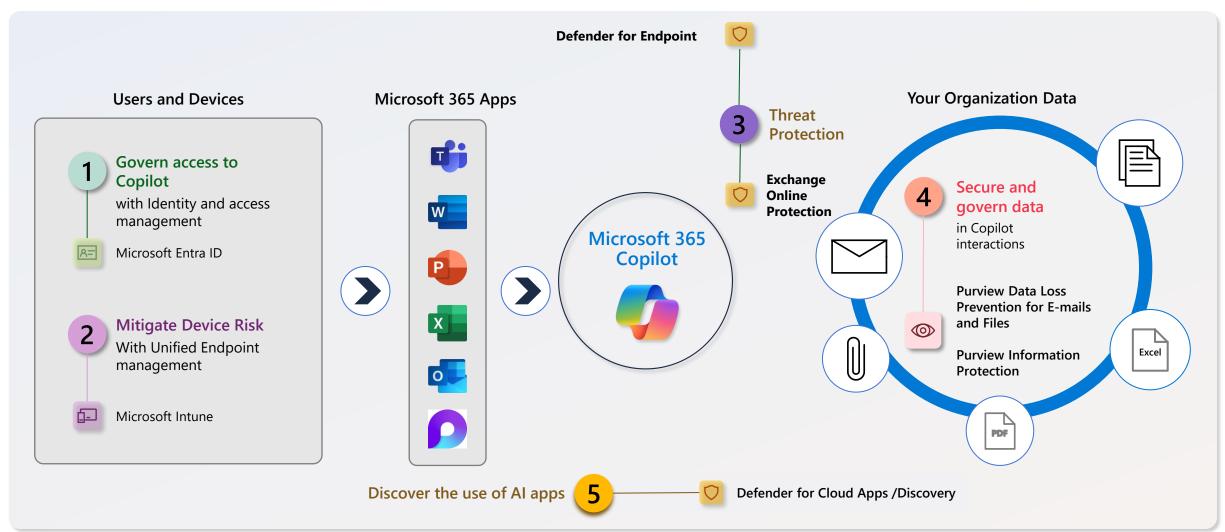

Block access to discovered web Al apps in the organization with Defender for Endpoint web protection

Elevate security for Copilot with Microsoft 365

Protect Identities, Devices, Applications, and Data

If you <u>aren't</u> a managed partner, what are your options?

Technical Presales and Deployment Services

Dave Field

Principal Partner Technical Consultant

Partner Audience: All #Copilot #Security #ModernWork #M365

Develop. Sell. Grow.

Plan, build and grow your technical capabilities and accelerate sales

Partner organizations receive technical & business enabler guidance from a Microsoft Partner Technical Consultant (PTC) through personalized, one-to-one consultations to plan, build and publish Microsoft AI & cloud services or applications and accelerate the closure of sales opportunities.

Plan your business with Microsoft

Get help assessing your organization's technical capabilities to uncover key opportunities that can help you grow your business.

Build a service or application

From envisioning to publishing, our consultants will advise and support you.

Technical assistance for sellers

Help to create demos and proofs of concepts and remove sales blockers to help close more sales opportunities.

Grow and support your business

Consultants are here to support you in growing and enhancing your solution, even after you've built and sold your service or application.

Get started today at https://aka.ms/tpd. Available to partner organizations with a Microsoft Al Cloud Partner Program user account and benefits associated with a Solutions Partner Designation, legacy Silver/Gold competency, Partner Success Core, Partner Success Expanded, or legacy Microsoft Action Pack.

Thank You ¡Muchas gracias! Merci
