

Threat Intelligence

Actionable insights for global threats

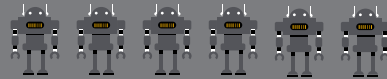

When it comes to cyber threats, does your organization have the right insights?

THE SIZE OF THE PROBLEM

140+

days before most cyber-attacks are detected within an organization⁽¹⁾

230,000

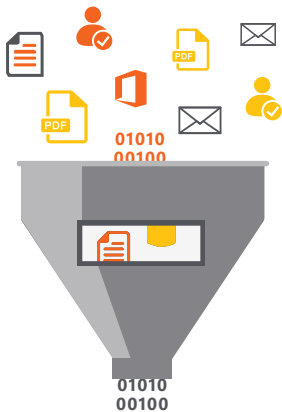

new types of malware were created **each day** in April 2015 and June 2015⁽²⁾

\$4 million

is the average **cost** of a breach to an organization⁽³⁾

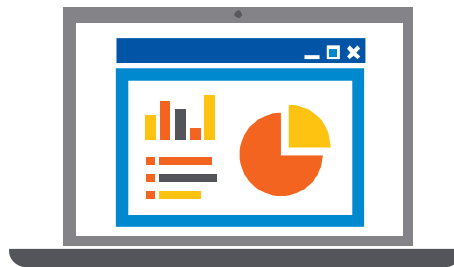

Get the broad visibility you need.

With Office 365 Threat Intelligence, data across the world is captured to provide insight into the threat landscape so you know the risks to your organization.

DID YOU KNOW: Microsoft analyzes 200 billion emails each month alone.

Get clarity with rich insights.

The Threat Intelligence dashboard provides a clear look into prospective threats to your organization in particular so you know where to focus.

DID YOU KNOW: Vulnerabilities are detected in real time for same day resolution.

Proactive cyber defense reduces costs.

Threat Intelligence enables proactive cyber security so that organizations can reduce the time and money spent on remediation efforts post-breach.

DID YOU KNOW: You can save \$30 per record breached by having a response plan in place.

Try Threat Intelligence with an E5 trial beginning in April
