

The GDPR deadline is approaching fast. Are you ready for the big day?

To comply with the new **General Data Protection Regulation (GDPR)**, businesses must run **several projects**. The overall success of this programme, depends on the ability to **coordinate multiple resources** while **respecting budget and time constraints** during the delivery of all projects.

With Project Online, businesses can manage the delivery of their GDPR programme effectively, by gaining **visibility and control across all workloads and resources involved**.

Are you on track to comply with GDPR?

The **4 Pillars for success** where Project Online is a primary tool to help.

Discover

- ✓ Can you identify all locations where personal data is stored across your business?
- ✓ Can you categorize the types of personal data in use?
- ✓ Is there a tool to categorize how and where personal data is used?

Manage

- ✓ Is there a data governance Program in place?
- ✓ When requested, are there processes in place to discontinue processing of personal data?
- ✓ Is there a mechanism to provide requestors with a copy of their personal data?
- ✓ Is there an appointed Data Protection Officer?

Protect

- ✓ Is the organization aware of available technologies for the encryption of personal data?
- ✓ Is the organization aware of the impacts of potential data breaches and is there a response plan in place?
- ✓ Does the organization perform tests of its security measures?

Report

- ✓ How are you progressing with workstreams designed to deliver against GDPR compliance requirements?
- ✓ Does the organization maintain records of processing activities for personal data and its purpose and scope?
- ✓ Does the organization have documentation about ongoing transfers of personal data in and out of the EU?
- ✓ Can the organization determine risks associated with personal data processing?

Deliver GDPR efficiently with Project Online:

Start simply, add capability gradually

Consistent, repeatable ways of working

Reporting & analysis, from teams to executives
